

**Patient Name:** [Jane Doe]  
**Age/Sex:** 68-year-old female  
**Date:** 6/28/2025  
**MRN:** M123456

---

### Chief Complaint:

Episodes of severe hypoglycemia

---

### History of Present Illness:

The patient is a 68-year-old female with a history of type 2 diabetes mellitus and hypertension who presents to her primary care provider for follow-up after a recent hospitalization for community-acquired pneumonia. She reports **two episodes of severe hypoglycemia** in the past 48 hours. Symptoms included dizziness, sweating, shakiness, confusion, and near syncope. One episode occurred in the morning before breakfast; the second occurred in the evening despite eating dinner. Home blood glucose readings during those episodes were **52 mg/dL** and **48 mg/dL**, respectively. She self-treated with orange juice and improved.

She denies fever, cough, or shortness of breath currently. Appetite remains decreased since her illness. No vomiting or diarrhea. No recent changes in diet or physical activity other than decreased appetite and activity due to recent illness.

---

### Past Medical History:

- Type 2 Diabetes Mellitus
  - Hypertension
  - Recent hospitalization for community-acquired pneumonia
- 

### Medications:

- **Glipizide** 20 mg PO daily
  - **Metformin** 1000 mg PO BID (recently resumed post-hospitalization)
  - **Lisinopril** 10 mg PO daily
  - **Glimepiride**, 2 mg/d daily
-

**Allergies:**

No known drug allergies

---

**Review of Systems:**

- **Constitutional:** Fatigue
  - **Endocrine:** Recent hypoglycemic episodes, no polyuria or polydipsia
  - **GI:** Mild decreased appetite, no nausea or vomiting
  - **Neuro:** Reports confusion during hypoglycemic events, now resolved
  - **Cardiac/Respiratory:** Denies chest pain, dyspnea
- 

**Physical Exam:****Vital Signs:**

- Temp: 97.9°F
- BP: 128/78 mmHg
- HR: 76 bpm
- RR: 16/min
- SpO<sub>2</sub>: 98% on room air

**General:** Alert, no acute distress

**Neuro:** Oriented x3, normal speech and coordination

**Cardiac/Lungs:** Normal exam

**Extremities:** No edema

**Skin:** Normal, no diaphoresis
